**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Surinder Sachar on 6/3/2009.

The application has been amended as follows:

2. The title of the invention is changed to: Rotary type CVD film forming apparatus for mass production

***Allowable Subject Matter***

3. Claims 1-7 and 10 are allowable over the prior art of record.

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance: Claims 1-7 and 10 are drawn to a rotary type CVD forming apparatus for mass production wherein a CVD/DLC film is coated on the inside of a plurality of plastic containers. The claimed apparatus comprises a plurality of film forming chambers wherein each chamber contains one columnar external electrode that includes a plurality of housing spaces for housing one plastic container each in one said housing space is in parallel with the

central axis of said external electrode and housing spaces are arranged side by side surrounding the central axis of the external electrode.

The closest prior art of record, as exemplified by Shimamura (US 6,294,226), Moriya (US 3,616,458), Nagashima et al. (US 5,798,139), Plester et al. (US 5,565,248), and Mackowski (US 4,746,538) all teach apparatuses for vapor phase coating of the internal surfaces of containers by striking a plasma between an internal electrode and an external electrode, and several of the references disclose simultaneously coating a plurality of containers (for e.g., see Shimamura). However, none of the references, alone or in combination, teaches or reasonably suggests an apparatus in which the columnar external electrode(s) each comprise a plurality of housing spaces capable of housing and processing a plurality of plastic containers in the manner claimed by the Applicants.

No other prior art anticipates or suggest fairly a rotary type CVD forming apparatus for mass production in which the columnar external electrode(s) each comprise a plurality of housing spaces capable of housing and processing a plurality of plastic containers in the manner claimed by the Applicants. Therefore, claims 1-7 and 10 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to XIAO ZHAO whose telephone number is (571)270-5343. The examiner can normally be reached on Monday to Friday 8:30 am EST to 5:00 pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Kornakov can be reached on (571)272-1303. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
